About Us

The parent company Suresh Metal Corp was established in 1971. Dhartidhan Metal Alloys was modernizing in 2018 located in brass city Jamnagar Gujarat. Our manufacturing facility spread over 66,000 sq feet.

We are the 3rd generation in metal alloy business, with over 50 years of experience we have extended our product line by adding new products in our portfolio and expanded our horizons through backward integration.

We are prominent manufacturers of High-Quality Secondary Zinc Ingots and also the manufacturer & suppliers of different grades of Brass Billets in India with wide range of length and alloys as per customer's requirement

We are equipped with various quality control equipment. All products manufactured by us are tested at our highly precised German testing lab – Bruker TASMAN Q4

Dhartidhan Metal Alloys have production capacity of 14,000 MT/Annum with the installation of 4 renowned gas melting furnace & 1 induction melting furnace

We are present in local as well as international market.

Dhartidhan Metal Alloys's presence in each of the industrial verticals is marked with technology-enabled products, high skilled people, structured process and entrepreneurial leadership, that come together to deliver unmatched value. Striving of providing such unmatched quality products.

We are proud member of Metal Recycling Association of India (MRAI) & Business Networking International (BNI).

Products

ZINC INGOTS

We are one of the prominent manufacturers and suppliers of high-quality Zinc Ingot.

Zinc ingots are mainly used as addition in manufacturing brass alloys for various brass components and products. They are also used in various industry and products like die-casting, alloys, galvanizing, oxide, chemical.

BRASS BILLETS

We are also into manufacturing and export of brass billets with wide range of length and alloys.

Brass Billets are mainly used in manufacturing brass rods, brass components, bearings, valves, sleeves, sanitary, electrical, hardware and automobile industries.
